1 MORTON STREET
NORWOOD, NY 13668
(315) 353-6692

WIRELESS INTERNET ACCESS POLICY

The following are rules and regulations of the Norwood Public Library. These are effective September 14, 2012 as adopted by the Board of Trustees of the Norwood Public Library.

The Norwood Public Library offers free wireless Internet access to library users with wireless-enabled devices. The library provides unrestricted access to the Internet and does not monitor or control content. The provisions set forth in the Library's Internet Use Policy and Acceptable Use Guidelines are applicable to wireless network access.

Our network supports a wide range of devices. Most wireless network cards will be compatible. However, the Library can make no guarantees as to compatibility of a library user's device with the Library's network. If a device doesn't recognize our wireless network, the library user should review the configuration settings provided at the Circulation desk. Library staff does not provide wireless access support and will not install or modify hardware or software.

Communication through the wireless network is not considered secure. Library users are responsible for selecting and installing security protection and current virus definitions on their wireless devices. The Library is not responsible for damage to hardware or software, transmission of computer viruses, loss of data or email, or any harm resulting from the use of an unsecured server. It is strongly advised that personal, financial or otherwise sensitive information should not be transmitted through the wireless network.

Wireless printing is available for 10 cents per black and white page and 50 cents per color page. The wireless network can accommodate interactive searches on the Web. It cannot accommodate the downloading of large document files. Therefore, downloading of software, images, music, etc. from the Web onto a library user's equipment is not permitted. Library users will be asked to terminate any activity that adversely impacts the network's performance.

When using wireless-enabled devices to listen to music, dialog, sound effects, etc. library users must use earphones to make the sound inaudible to others. If sound is heard despite the earphones, the library user must lower the sound level or turn the equipment off.
